DETAILED ACTION

Response to Amendment

Specification

The amendment filed 3/5/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: There is no disclosure in the original claims or specification of which elements correspond to a means for releasably coupling the piston to a front head of the pusher or a releasable means for securing the syringe to a front face of the injector. The Examiner suggests eliminating the means plus function language and reciting the structure in the claims.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 12 and 17-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. See the objection above.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12 and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are unclear because the applicant is claiming the same structure more than once. The applicant has defined the means for releasable coupling the piston to the pusher head as tabs (30) and convex surface (33), but the tabs are previously claimed in the independent claim. The applicant has also defined the releasable means as the syringe support, but the claims are recited as if they are different elements.

Response to Arguments

Applicant's arguments filed 9/21/2007 have been fully considered but they are not persuasive. In response to the applicant's argument that the amendments filed on 3/5/2007 do not recite new matter, the examiner respectfully disagrees. The applicant never specified in the original disclosure which elements correspond to the means plus function language. Furthermore, the claims are indefinite in light of the amendments to the specification because the same structures are claimed more than once. The applicant is invited to contact the examiner for suggestions to clear up the claim language.

Conclusion

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
